## Correlated to Native American Education Lessons

**Highlighted Standards were updated in 2018**

### **Social Studies Content Standard 1 - Citizenship, Government, and Democracy**

Students analyze how people create and change structures of power, authority, and governance to understand the continuing evolution of governments and to demonstrate civic responsibility.

#### Rationale

The vitality and continuation of a democratic republic depends upon the education and participation of informed citizens. All students should have opportunities to apply their knowledge and skills and participate in the workings of the various levels of power, authority, and governance, which should be applied to the rights and responsibilities of good citizenship. W.S.21-9-102 requires all publicly funded schools in Wyoming to “give instruction in the essentials of the United States constitution and the constitution of the state of Wyoming, including the study of and devotion to American institution and ideals...” In order to receive a high school diploma, instruction must be given for at least three (3) years in kindergarten through grade eight (8) and one (1) year in the secondary grades.

SS12.1.1 Analyze unique freedoms, rights, and responsibilities of living in a democratic society and explain their interrelationships.

**SS12.1.1.a** Compare the rights, duties, and responsibilities (inherent rights, treaty obligations, and tribal sovereignty) of being a tribal member on the Wind River Indian Reservation to the rights, duties, and responsibilities of an American citizen.

**Social Studies Content Standard 2 - Culture and Cultural Diversity**

Students demonstrate an understanding of the contributions and impacts of human interaction and cultural diversity on societies.

Rationale

Culture helps us to understand ourselves as both individuals and members of various groups. In a multicultural society, students need to understand multiple perspectives that derive from different cultural vantage points. As citizens, students need to know how institutions are maintained or changed and how they influence individuals, cultures, and societies. This understanding allows students to relate to peoples of local, tribal, state, national, and global communities.

SS12.2.1 Analyze and evaluate the ways various groups (e.g., social, political, and cultural) meet human needs and concerns (e.g., individual needs and common good) and contribute to identity (e.g., group, national, and global), situations, and events.

**Social Studies Content Standard 3 - Production, Distribution, and Consumption**

Students describe the influence of economic factors on societies and make decisions based on economic principles.

Rationale

In a global economy marked by rapid technological, political, and economic change, students will examine how people organize for the production, distribution, and consumption of goods and services.

SS12.3.1 Analyze the impact of supply, demand, scarcity, prices, incentives, competition, and profits on what is produced, distributed, and consumed.

SS12.3.2 Analyze and evaluate how people organize for the production, distribution, and consumption of goods and services in various economic systems (e.g., capitalism, communism, and socialism).

SS12.3.5 Evaluate how values and beliefs influence microeconomic and macroeconomic decisions.

**Social Studies Content Standard 4 - Time, Continuity, and Change**

Students analyze events, people, problems, and ideas within their historical contexts.

Rationale

Students need to understand their historical roots and how past events shape the present, and may shape the future. Students must know what life was like in the past to comprehend how things change and develop over time. Students gain historical understanding through inquiry, and through researching and interpreting events affecting individual, local, tribal, state, national, and global histories.

SS12.4.1 Describe patterns of change (cause and effect) and evaluate how past events impacted future events and the modern world.

**Social Studies Content Standard 5 - People, Places, and Environments**

Students apply their knowledge of the geographic themes (location, place, movement, region, and human/environment interactions) and skills to demonstrate an understanding of interrelationships among people, places, and environment.

Rationale

Students gain geographical perspectives of the community, state, nation, and world by studying the Earth and how humans interact with people, places, and environments. Their knowledge of geography allows students to make local and global connections. Students develop increasingly abstract thought as they use data and apply skills to analyze human behavior in relation to its physical and cultural environment.

SS12.5.1 Use geographic tools and reference materials to interpret, analyze, evaluate, and synthesize historical and geographic data to demonstrate an understanding of global patterns and interconnectedness.

**Social Studies Content Standard 6 - Technology, Literacy, and Global Connections**

Students use technology and literacy skills to access, synthesize, and evaluate information to communicate and apply social studies knowledge to global situations.

Rationale

Using a variety of resources, students will apply the inquiry process to locate, interpret, and evaluate multiple primary and secondary sources. Students will use this information to become critical thinkers and decision makers in a global community. Social Studies Content Standard 6 was written around the Framework for 21st Century Skills and the Common Core Literacy Standards for History and Social Studies.\*
